IFRS18 "Presentation and Disclosure in Financial Statements"

IFRS18 will supersede IAS1 "Presentation of Financial Statements," and the main changes of the standard include:

- The income statement should classify income and expense items into operating, investing, financing, income tax and discontinued operations.
- The profit and loss statement should present operating profit or loss, profit or loss before financing and income tax, and the subtotals and total of profit or loss.
- Provide guidance to strengthen aggregation and disaggregation requirements: A consolidated entity must identify the assets, liabilities, equity, income, expenses, and cash flows arising from individual transactions or other events, and classify and aggregate them based on shared characteristics, so that each line item presented in the primary

financial statements possesses at least one similar characteristic. Items with non-similar characteristics shall be separated in the major financial statements and notes. The Consolidated Company may only mark such items as “others” when it is unable to find a more informative label.

- Enhance disclosure of management-defined performance measures: When a consolidated entity engages in public communications outside the financial statements and communicates with users of the financial statements regarding management's perspective on a particular aspect of the consolidated entity’s overall financial performance, it shall disclose, in a single note to the financial statements, relevant information on the management-defined performance measure. This includes a description of the measure, how it is calculated, a reconciliation with subtotals or totals specified by IFRS Accounting Standards, and the tax and non-controlling interest impacts of the related reconciliation items.

Except for the abovementioned effects, the Consolidated Company continues to evaluate the other effects of the amended standards and interpretations on the financial position and financial performance; relevant effects will be disclosed when the evaluation is completed.

IV. Summary of significant accounting policies

(I) Statement of compliance

The consolidated financial statements have been prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and IAS 34 “Interim Financial Reporting” endorsed and issued into effect by the FSC. The consolidated financial statements did not contain all the disclosures required by IFRS Accounting Standards in the full annual financial statements.

(II) Basis of preparation

Except for financial instruments measured at fair value and net defined benefit assets recognized based on the present value of defined benefit obligations less the fair value of plan assets, the consolidated financial statements are prepared based on historical costs.

Fair value measurement is divided into levels 1 to 3 according to the observability and importance of relevant input values:

1. Level 1 input value: refers to the quoted price (unadjusted) of the same assets or liabilities available in the active market on the measurement date.
2. Level 2 input value: refers to the directly (i.e., price) or indirectly (i.e., derived from price) observable input value of assets or liabilities other than the quotation of level 1.
3. Level 3 input value: refers to the unobservable input value of assets or liabilities.

(III) Basis of consolidation

The consolidated financial statements include the financial statements of the Company and the entities (subsidiaries) controlled by the Company. The consolidated statement of comprehensive income has included the operating gain or loss of subsidiaries acquired or disposed of from the date of acquisition or to the date of disposal. The financial statements of the subsidiaries have been adjusted so that their accounting policies are consistent with those of the Consolidated Company. In the preparation of the consolidated financial statements, all transactions, account balances, gains and expense losses among the entities have been eliminated. The total comprehensive income of the subsidiaries is attributable to the owners and is the non-controlling interest of the Company, even if the non-controlling interest becomes a loss.

Where the change of ownership rights of the subsidiaries of the Consolidated Company does not result in a loss of control, it shall be treated as an equity transaction. The book amounts of the consolidated company and non-controlling interests have been adjusted to reflect the change in the relative interests in subsidiaries. The difference between the adjusted amount of non-controlling interests and the fair value of the consideration paid or received is directly recognized as equity and attributable to the owners of the Company.

For details of subsidiaries, shareholding ratios and business items, please refer to Note 11 and Table 6.

(IV) Other significant accounting policies

In addition to the following explanations, please refer to the summary of significant accounting policies in the 2024 consolidated financial statements.

1. Defined post-employment benefits

   Pension cost for the interim period is calculated using the actuarially determined pension cost rate as of the end of the previous year, from the beginning of the year to the end of the current period, and is adjusted for significant market fluctuations, major plan amendments, settlements or other significant one-time events during the period.

2. Share-based payment arrangements

   The employee stock options granted to employees are recognized as expenses on a straight-line basis over the vested period based on the fair value of the equity instruments at the grant date and the best estimate of the amount expected to vest, with a simultaneous adjustment to capital reserve - employee stock options. If it is vested immediately on the grant date, the full amount is recognized as an expense on the grant date. The Company's cash capital increase reserved for employee subscription takes the date on which the number of shares subscribed by employees is confirmed as the grant date.

3. Income tax expenses

Income tax expense is the sum of current income tax and deferred income tax changes. Income tax for the interim period is assessed on an annual basis and is calculated by applying the tax rate expected to be applicable to the total annual profit to the pre-tax profit for the interim period.

V. Major sources of uncertainty of significant accounting judgments, assumptions, and estimates

For major sources of uncertainty in the significant accounting judgments, estimates and assumptions used in the Company's consolidated financial statements, please refer to the 2024 consolidated financial statements.

IX. Accounts receivable

	September 30, 2025	December 31, 2024	September 30, 2024
Measured at amortized cost			
Total carrying amount	$ 4,056,297	$ 5,686,226	$ 5,874,151

	$ 4,000,277	$ 5,611,628	$ 5,810,729

The average credit period of the Consolidated Company for commodity sales is approximately 90 days, and the accounts receivable are not subject to interest. In order to reduce credit risk, the management of the consolidated company has assigned a special team to be responsible for the decision of credit facilities, credit approval and other monitoring procedures to ensure that appropriate actions have been taken for the recovery of overdue amounts receivable. In addition, the Consolidated Company will review the recoverable amounts of amounts receivable one by one on the balance sheet date to ensure that appropriate impairment loss has been provided for the receivables that cannot be recovered. Therefore, the management of the consolidated company thinks that the credit risk of the Consolidated Company has been significantly reduced.

The Consolidated Company shall recognize the provision for loss of notes receivable and accounts receivable according to the lifetime expected credit loss. Apart from the provision of impairment losses based on the credit impairment of individual customers, the Consolidated Company set up the expected credit loss rate with reference to the past default records and current financial position of customers and the economic development of the industry, taking into account the GDP forecasts and industry prospects. In addition, for accounts receivable aging over 365 days with no other credit guarantees provided, 100% of the loss allowance is recognized. As the historical

experience of credit loss of the Consolidated Company shows that there is no significant difference in the loss pattern of different customer groups, the preparation matrix does not further distinguish customer groups, and only uses the overdue days of accounts receivable to determine the expected credit loss rate.

If there is evidence that the counterparty is facing serious financial difficulties and the Consolidated Company cannot reasonably expect the recoverable amount (i.e., if the transaction counterparty is in liquidation or the debt is overdue for over two years), the Consolidated Company will directly write off the relevant accounts receivables, but will continue the recourse activities, and the amount recovered due to recourse will be recognized as income.

The Consolidated Company measures the provision for loss of accounts receivable according to the provision matrix (based on the invoice date) as follows:

(IV) Purpose and policy of financial risk management

The Consolidated Company's main financial instruments include accounts receivable, accounts payable, accounts payable (including related parties), borrowings, and lease liabilities. The Financial Management Department of the consolidated company provides services for all business units, coordinates the entry into domestic and international financial markets, and supervises and manages the financial risks related to the operation of the consolidated company by analyzing the internal risk report of the exposure according to the risk level and breadth. These risks include market risk (including exchange rate risk and interest rate risk), credit risk and liquidity risk.

1. Market risk

The main financial risk caused by the operating activities of the consolidated company to the consolidated company is the foreign currency exchange rate change risk (refer to (1) below) and the interest rate change risk (refer to (2) below).

(1) Exchange rate risk

Multiple subsidiaries of the Consolidated engage in sales and purchases denominated in foreign currencies, which results in the exposure of the Consolidated Company to changes in the exchange rate. For the management of exchange rate exposure, the Consolidated Company adopts natural hedging measures for foreign currency positions generated from operating activities, and the financial and accounting departments will carefully select the timing of foreign exchange settlement and adjust the ratio of different foreign currency accounts to achieve the management of exchange rate risk.

For the carrying amount of the Group’s monetary assets and monetary liabilities denominated in non-functional currencies on the balance sheet date (including monetary items denominated in non-functional currencies written off in the consolidated financial statements), please refer to Note 28.

Sensitivity analysis

The Consolidated Company is mainly affected by fluctuations in the exchange rates of USD.

The table below details the sensitivity analysis of the Consolidated Company when the exchange rate of the functional currency changes by 1% against relevant foreign currencies. The sensitivity analysis only includes the monetary items that are in circulation, and the conversion at the end of the period is adjusted by 1% of the exchange rate change. The positive numbers in the following table represent the amount of net profit before income tax that will increase when the functional currency depreciates by 1% relative to each foreign currency; when the functional currency

appreciates by 1% relative to each relevant foreign currency, its impact on the net profit before income tax will be a negative number of the same amount.

	Effects of USD (Note 1)		Effects of NTD (Note 2)	
	From January 1 to September 30, 2025	From January 1 to September 30, 2024	From January 1 to September 30, 2025	From January 1 to September 30, 2024
Profit or loss	$ 10,772	$ 31,075	$ 2,270	($ 17,173)

Note 1: It mainly comes from the Consolidated Company's outstanding cash, accounts receivable, and accounts payable denominated in USD that are still outstanding on the balance sheet date without cash flow hedging.

Note 2: Mainly derived from cash, accounts receivable, loans and accounts payable denominated in NTD that are still in circulation and not hedged on the Group's balance sheet date.

(2) Interest rate risk

Interest rate exposure is caused by the fact that entities in the Consolidated Company borrow funds at fixed and floating rates. The Consolidated Company manages interest rate risk by maintaining an appropriate profile of fixed and floating interest rates.

The carrying amounts of the financial assets and financial liabilities of the Consolidated Company subject to interest rate exposure on the balance sheet date are as follows:

	September 30, 2025	December 31, 2024	September 30, 2024
Interest rate risk involving fair value			
Financial assets	$ 2,291,453	$ 832,110	$ 1,170,610
Financial liabilities	411,065	797,021	1,474,980
Interest rate risk involving cash flow			
Financial assets	1,174,343	3,320,114	3,389,112
Financial liabilities	-	648,974	594,579

Sensitivity analysis

The following sensitivity analysis is based on the interest rate exposure of non-derivative instruments on the balance sheet date. For floating rate assets and liabilities, it is assumed that the amount of assets and liabilities outstanding on the balance sheet date is also outstanding during the reporting period. The change rate used within the Group to report interest rates to the key management is the increase/decrease in interest rate by 50 base points, which also represents the evaluation of the management regarding the scope of reasonable and possible changes in interest rate. If the interest rate increases/decreases by 50 basis points, with all other variables remaining unchanged, the pre-tax net profit of the Group from January 1 to

September 30, 2025 and 2024, will increase/decrease by $4,404 thousand and $10,479 thousand, respectively.

2. Credit risk

Credit risk refers to the risk of financial loss caused by default of contractual obligations of the counterparty. As of the balance sheet date, the maximum credit risk exposure of the Consolidated Company that may be due to financial losses caused by the failure of counterparties in performing the obligations is mainly from the carrying amount of financial assets recognized in the balance sheet.

The policy adopted by the Consolidated Company is to conduct transactions only with reputable counterparties and obtain sufficient guarantees under necessary circumstances to reduce the risk of financial losses due to defaults. The Consolidated Company continues to monitor credit risks and the credit ratings of its counterparties, and controls credit exposure through regular examination and approval of credit limits of the counterparties.

Except for the top three customers, the Consolidated Company does not have any material credit exposure due to any single counterparty or a group of counterparties with similar features. When the counterparty is an affiliate, the Consolidated Company defines it as a counterparty with similar features. Among the balance of accounts receivable on September 30, 2025, December 31, 2024, and September 30, 2024, the credit risk concentration regarding the top three customers did not exceed 36%, 45% and 44% of total monetary assets, respectively, and the credit risk concentration regarding other transaction counterparties did not exceed 10%, 15% and 12% of total monetary assets, respectively.

3. Liquidity risk

The Consolidated Company manages and maintains sufficient cash positions to support the Group’s operations and mitigate the impact of cash flow fluctuations. The management of the Consolidated Company supervises the use of the bank financing limit and ensures compliance with the terms of borrowing contracts.

Bank borrowings are an important source of liquidity for the Consolidated Company. For the Consolidated Company's unused financing limit, please refer to the description in (3) financing limit below.

(1) Table of liquidity and interest rate risk of non-derivative financial liabilities

The maturity analysis of the remaining contracts of non-derivative financial liabilities is based on the undiscounted cash flow (including principal and estimated interest) of financial liabilities on the earliest possible repayment date of the Consolidated Company. Therefore, the series of bank loans that the consolidated company may be required to repay immediately shall not take into account the probability of the bank executing the right immediately in the earliest period in the table below; the maturity analysis of other non-derivative financial liabilities shall be prepared according to the agreed repayment date.

The following table is the maturity analysis of non-derivative financial liabilities with agreed repayment periods of the Consolidated Company summarized and presented based on the maturity date and the undiscounted maturity amount:
